

ECE2274 and ECE3274 exam information.

The exam is **closed book and notes**. You will need a calculator and flash drive. You may bring your own clear proto board and parts. The best way to prepare for the exam is to do one of your lab exercises by yourself.

The final exam will be a timed 1 hour 20 minutes exam, you will work by yourself to perform the exam. Your class will be split into two groups one group will take the exam for the first 1 hour and 20 minutes the second group will take the exam for the second 1 hour and 20 minutes.

You will do the calculation similar to the laboratory experiments, build the circuit, make the measurement with the meters, oscilloscope, and run the SignalExpress software, copy your plots from signal express to your flash drive and print your result to be turned in with your exam solution. You will be given time (10 minutes) after the exams are collected to print your saved plots.
